Foreword

This 2019 Budget has been prepared based on the principles of the Kiribati Development Plan 2016-19, the Kiribati Vision 20 (KV20), and the priorities of the Government as envisioned in Te Motinnano. In June 2018 the Government launched Kiribati Vision 20 (KV20), which set out our vision for a wealthier, healthier and peaceful Kiribati over 2016-2036. The KV20 is a blueprint for sustainable and inclusive development, focusing on the key sectors of fisheries and tourism, as well as developing human capital, investing in infrastructure, and promoting good governance.

Since taking office in 2016, the Government has made significant strides to delivering on the KV20 ambition. We have increased direct economic support to the rural population through doubling the copra price, introduced fee-free education for forms 4, 5 and 6, and reduced the cost of access to electricity in South Tarawa. We have also delivered on our commitments to improve the pay and working conditions for public servants, and invested in better transport and telecommunications links within Kiribati and internationally.

Importantly, these initiatives have been fully funded within the Government's revenue envelope. Macroeconomic stability is a critical foundation for our economic growth targets, and prudent and sustainable fiscal management is a key priority for this Government. As described in the Fiscal Strategy for the 2019 Budget, the first Fiscal Strategy to be made publicly available in Kiribati, the Government is committed to running at least a balanced budget in 2019.

The dramatic increase in fisheries revenue that Kiribati has experienced in recent years serves to demonstrate the transformational potential of our marine resources. It is vitally important that both our EEZ and our inshore fisheries are managed sustainably for the benefit of current and future generations of I-Kiribati. To that end, we have amended our Fisheries Act to define Illegal, Unregulated and Unreported fishing in line with international practice, and increase the penalties for fishing violations in our EEZ and in our coastal waters. We are also committed to increasing value-added and job creation from our EEZ, and are exploring the development of fisheries transshipment hubs to support satellite services in Betio and Kiritimati.

The Revenue Equalisation and Reserve Fund (RERF) is one of Kiribati's most important assets and it is critical that it is managed effectively to provide benefits to both present and future generations. As well as making a \$70 million transfer to the RERF in 2016, the Government has realised a number of management reforms, including implementation of new asset managers and the appointment of a new custodian through a competitive selection process. Cabinet recently approved the adoption of a clear set of objectives for the management of the RERF, designed to reach the KV20 target of an asset value of A\$1 billion by 2020, and – going forward – to maintain the real value of the fund while using a portion of RERF returns to finance development projects. High fisheries revenue in recent years has allowed Kiribati to accumulate significant cash reserves, which can now replace the traditional revenue stabilisation role of the RERF. Cabinet recently adopted a Cash Management Policy to ensure that these significant cash reserves are managed as efficiently as possible while still meeting the liquidity needs of the government and the banking system.

Another public financial management priority is improving transparency and value for money in procurement. 2018 saw the establishment of a new Central Procurement Unit in the Ministry of Finance and Economic Development, and we look forward to working closely with development partners to continue implementing the Kiribati Public Procurement Reform Programme in 2019.

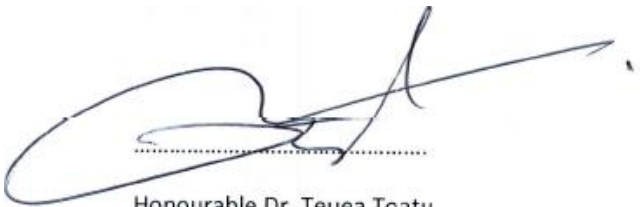

Our vision for a healthy and wealthy Kiribati cannot be achieved without improved infrastructure and services. Access to safe drinking water is a particular challenge in South Tarawa, where the water lenses are coming under increased strain from climate change and population growth. This Government is particularly mindful of how access to safe drinking water improves the health and

wellbeing of women and children, as well as men. With the support of the Asian Development Bank and other development partners, we are working on climate-proof solutions to expand access to potable water. Our Public Utilities Board is piloting 24/7 piped water to 400 households, with plans to roll out to all of South Tarawa in the coming years. Cabinet has approved a tariff for the pilot 24/7 water service, to incentivise water conservation and customer service. We are also working with the New Zealand Government to strengthen our asset management and maintenance systems, to ensure that our infrastructure delivers to its expected service standard over its whole economic life.

Last but not least, our Government is committed to ensuring all I-Kiribati receive a high-quality education and have access to decent employment. Our fee-free policy for senior secondary education is an important milestone towards this aspiration, and the new Early Childhood Care and Education Act signals our commitment to improve quality and access to early education for all I-Kiribati children.

I would like to acknowledge the assistance of our development partners in supporting our policies for sustainable and inclusive development.

I would like to thank the Asian Development Bank, the European Union, the Australian Government, the New Zealand Government, the World Bank, the International Monetary Fund and the Pacific Financial Technical Centre for their technical assistance to the Ministry of Finance and Economic Development during 2018. I would also like to thank those staff members in this Ministry and line Ministries and Departments who have made a valuable contribution to the preparation of this Budget document.

Honourable Dr. Teuea Toatu
Minister of Finance and Economic Development

November 2018

Introduction

The 2019 Budget layout is similar to the format of the past years. It maintains the new tables introduced last year, notably the medium term fiscal framework, which now follows more closely the international GFS reporting standard, including the impacts of the Budget on cash reserves. As in the 2018 Budget, many tables include the previous year's actual (in this case: 2017), a revised 2018 Budget figure (which includes all Supplementary Budgets), and forward estimates where possible. Appendix 6 (Debt) has also been expanded to provide longer-term information as well as contingent liabilities.

The recurrent budget showing revenue, expenditure on Ministry operations, other commitments and new projects (approved Ministerial Operational Plan activities with secured funding only) are consolidated in one table under each Ministry. This presentation assists in the monitoring of programs and projects and it also reinforces integration of the recurrent and development budgets.

Each Expenditure Head has two tables, (a) and (b). Table (a) is the Medium Term Expenditure Framework for each Expenditure Head together with projections of revenue over the medium term period. Table (a) also includes estimates for other commitments (including local contributions to the Development Fund) for 2019 and the following three outer years. This table provides a focus on revenue that ought to be collected by each Ministry. The aim is to stress that Ministries should not be concentrating solely on their expenditure program but that equal weight needs to be given to the collection of much needed revenue from identified sources. Table (b) is a combined table listing the estimates for revenue, expenditure and other commitments by inputs and by ministry programs and outputs for the budget year only.

The assumptions for the 2019 Budget are drawn mainly from the IMF 2018 Article IV Consultations for Kiribati, which were conducted in October 2018:

Ministry of Commerce, Industry and Cooperatives

Responsible Minister: Minister of Commerce, Industry and Cooperatives

Accounting Officer: Secretary for Commerce, Industry and Cooperatives

Outcomes Sought:

The main objective of the Ministry is the development of a liberal, business friendly, and economic environment. This includes the intent to safeguard, promote, facilitate and regulate the activities of the private sector engagement in commerce, industry, cooperatives and credit unions and supervise public enterprises operating in the sector. Promotion and facilitation of domestic investments including cooperatives, credit unions and foreign investment in a transparent and non-discriminatory manner are the main tasks of this Ministry. This is important given the relatively stagnant domestic economy. There is a great need to increase economic growth and poverty reduction to meet the needs of a rapidly growing population. Regulatory activity is the minimum required to achieve the Government's aims of ensuring fair business practices for consumers, and avoidance of monopolistic tendencies and restrictive practices which hamper the growth of enterprises.

Recurrent Budget Programs for 2019:

Administration and Policy Development: Provides administrative support and advice for the effective and efficient operation of the Ministry.

Business Regulatory Centre: Acts as a regulatory arm of MCIC. BRC's core function focuses on the implementation and enforcement of laws administered by the Ministry. Business Promotion Centre: Supports and provides business advice, market access and trade policy advice. Facilitates trade programs in country. It also oversees establishment and development of cooperatives and credit unions, investment and industry. It also supports training and promotion for cooperatives and credit unions.

MCIC Kiritimati Branch: Kiritimati Branch undertakes the functions and programs of the Ministry on Kiritimati Island. It carries out the trade promotion and business regulatory activities in the Line and Phoenix Islands.

Ministry of Fisheries and Marine Resources Development

Responsible Officer: Minister of Fisheries and Marine Resource Development

Accounting Officer: Secretary for Fisheries and Marine Resource Development

Outcomes Sought

Maximising returns from marine resources, while utilizing resources on a sustainable basis; enhancing research in fisheries and marine resources for commercial and restocking purposes through partnership between the national government and overseas research organisations. This implies a movement away from a focus on activities which require high levels of government support (either by way of direct or indirect subsidy, tariff protection, etc) to establishing activities which are capable of being self-sustaining. More specific aims of the Ministry are: increasing production of fisheries and marine resources for export, and diversification of the production base; encouraging consumption of nutritious local food – fish and marine products; transfer of technology in fish farming, fishing techniques and prototype boats; commercialisation of resource based industries, together with conservation and management of marine resources.
